PROFILE

I'm a fifth-semester Computer Science and Engineering student with practical experience in Python, the MERN stack, and PHP. I enjoy learning new technologies, taking initiative in team projects, and ensuring tasks are completed efficiently and on time.

PROFESSIONAL EXPERIENCE

Freelance Web Developer — Totesberry_()

Sep 2025 - Present

- Built a freelance e-commerce web app Totesberry using PHP (PDO), HTML5, CSS3 with secure and efficient database handling.

Intern — KMS Solution

15 Jun 2025 - 30 Jun 2025

- Developed an automated PDF data extraction system using Python (Flask) and MySQL, enabling seamless data storage through a web interface.

Tech Guy — Concert Circle (<https://concertcircle.com/>)

Feb2025 - Aug 2025

- Launched Phase 1 of the platform with a complete, feature-rich admin panel.
- Led Phase 2 development, focusing on improved functionality and performance.
- Collaborated closely with the team to plan, implement, and refine technical solutions.
- Managed Concert Circle's Instagram handle (@concertcircle), gaining experience in social media strategy and engagement.

Intern — Sparrow Softech

May 2024 - Jan 2025

- Worked on MERN stack development to build scalable and efficient web application components.
- Contributed to **Pictora**, a production-level app now live on the [App Store](#) and [Google Play Store](#).
- Gained hands-on experience in person detection and surveillance system development.

EDUCATION

SSC, L.G. Kakadiya Secondary/Higher Secondary School - Bhavnagar

2021

HSC, Akshar Jyoti High School - Surat

2023

Bachelor of Technology (**B.Tech**) in Computer Science and Engineering (GMIU) - 5th SEM

2023- Present

ACHIEVEMENTS

- Consistently ranked in the **top 5** of the class each year in the CSE batch.
- Secured 2nd place in an automation hackathon conducted by Floatbot.ai.

PROJECTS

- Pictora App:** Image enhancement app using GFPGAN & Real-ESRGAN (Python); live on Play Store Store.
- Concert Circle:** Built admin panel (PHP); currently working on Phase 2 with MERN stack.
- Smart Surveillance:** Person detection prototype using Python (YOLO, OpenCV) for real-time monitoring.

RESEARCH

- Investigating GFPGAN and Real-ESRGAN models to compare results and explore methods to combine them for a hybrid image enhancement solution.
